## Walking trails and beaches Randonnées et plages Senderismo y playas Senderrisme i platges

Per quèques i suggeriments adreçar-se a l'Oficina de Turisme de Begur o bé trucar al telèfon 972 624 520.

Les platges de Begur tenen la seva política de qualitat basada en la millora contínua, amb la finalitat d'oferecals als usuaris de les platges els màxims nivells de qualitat, confort i seguretat per aconseguir així la seva satisfacció. Amb el nostre sistema de gestió promovem la participació i la involucració del personal i dels nostres proveïdores, a més de procurar el respecte pel medi ambient i la seguretat, la neteja i el manteniment de les nostres platges. Per tal de consultar la política de qualitat completa, es poden dirigir a l'Ajuntament de Begur o bé a la web [www.begur.cat](http://www.begur.cat).

Per consultar els objectius de qualitat a les platges de l'any en curs, any anterior i indicadors, cal dirigir-se a la web [www.begur.cat](http://www.begur.cat).

Para quejas y sugerencias dirigirse a la Oficina de Turismo de Begur o bien llamar al teléfono 972 624 520.

La política de calidad de las playas de Begur está basada en la mejora continua, con la finalidad de ofrecer a los usuarios de las playas los máximos niveles de calidad, confort y seguridad para conseguir así su satisfacción. Con nuestro sistema de gestión promovemos la participación y la implicación del personal y de nuestros proveedores, además de procurar el respeto por el medio ambiente y la seguridad, la limpieza y el mantenimiento de nuestras playas. Para consultar la política de calidad completa, se puede dirigir al Ayuntamiento de Begur o bien a la web [www.begur.cat](http://www.begur.cat).

Para consultar los objetivos de calidad en las playas del año en curso, año anterior e indicadores, dirigirse a la web [www.begur.cat](http://www.begur.cat).

Pour plaintes et suggestions contactez l'Office de Tourisme de Begur ou bien téléphonez au +0034 972 624 520.

La politique de qualité des plages de Begur est basée en l'amélioration continue. Avec la finalité d'offrir aux usagers des plages les maximums niveaux de qualité, confort et sécurité pour obtenir leur satisfaction. Avec notre système de gestion on promeut la participation et l'implication du personnel et de nos fournisseurs, en plus de procurer le respect pour l'environnement et la sécurité, nettoyage et maintenance de nos plages. Pour avoir plus d'information sur cette politique de qualité, vous pouvez contacter la Mairie de Begur, ou la site internet [www.begur.cat](http://www.begur.cat).

Pour consulter les objectifs de qualité aux plages de cette année, l'antérieur et indicateurs, s'adresser à la site internet [www.begur.com](http://www.begur.com).

For claims or suggestions please contact the Begur Tourist Office or call (+0034) 972 624 520.

The Begur beaches quality policy is based on the continuous improvement, with the finality of offering to beaches users the maximum levels of quality, comfort and security in order to get its satisfaction. With our management system we promote participation and involve the staff and our suppliers; apart from caring about the respect to the environment and security, cleanliness, and maintenance of our beaches. In order to know more about this quality policy, you can get in contact with the Begur Town Hall or check the website [www.begur.cat](http://www.begur.cat).

In order to consult the quality on the beaches objectives for the present year, the previous year and indicators, please check the website [www.begur.cat](http://www.begur.cat).

## ITINERARI 1 ↴ CAMÍ DE L'AIGUA Begur - Sa Riera

- Temps total aprox. / Tiempo total aprox.  
Durée totale indicative / Approximate total duration: 40 min.
- Quilometratge / Kilometrage / Distància / Distance: 2,60 km.
- Esforç i dificultat: Baix - Mitjà / Esfuerzo y dificultad: Bajo - Medio  
Effort and difficulty: Bas - Moyen / Effort and difficulty: Low - Medium
- Desnivell / Desnivel / Dénivelé / Slope: 178 m.
- Punt de sortida i punt d'arribada: Rotonda del cementiri / Punto de salida y punto de llegada:  
Rotonda del cementerio / Points de départ et d'arrivée: Rond-point du cimetière  
Departure and arrival points: Cemetery roundabout
- Senyalització: Senyals indicatius i marques verdes i blanques / Señalización: Señales indicativas y marcas verdes y blancas / Signalisation: Signalée avec des panneaux indicateurs couleur verte et blanche / Trail indication: Green and white marks

[CA] El punt de sortida és la rotonda del cementiri, a l'entrada del poble. Seguint la senyalització crearem el parc de l'arbreda i arribem a l'aparcament situat just al nord del parc (aquest és un punt de sortida alternatiu però viatjants amb cotxe). Des de l'aparcament arribem a l'esplanada amb el conjunt format per una cisterna, una androna i una pareta seca (1). Crearem el pont següent el camí i crearem la riera just abans d'abrir al cu-de-sac del carrer Mercuri. En aquest punt hem de continuar pel sender que discorre paral·lel al marge dret de la riera fins al proper creuament, just abans del segon conjunt de patrimoni vinculat a la cultura de l'aigua, format per una deu, un safareig i un pou (14). A partir d'aquí el camí realitza tres creuaments de carers: el c. Isidre Monell, la ctra. de la Platja del Racó i el c. Rocà del Mas Mató, cada un dels quals està senyalitzat amb passos de viandants. A partir d'aquí, el sender segueix la riera fins arribar al molí del mas Mató (15), un conjunt integral per molti i la paret en forma de llitera "E" utilitzada per acumular l'aigua que prové de la font de la Pera. A la part sud de l'esplanada hi ha l'accés que condueix al carrer Santiago Russiñol i que ens porta cap a la platja de Sa Riera (16).

[ES] El punto de salida es la rotonda del cementerio, en la entrada del pueblo. Siguiendo la señalización cruzamos el parque de la arboleda y llegamos a un aparcamiento situado justo al norte del parque (este es un punto de salida alternativo para los visitantes que lleguen en coche). Desde el aparcamiento, llegamos a la explanada con una cisterna, una androna y una pared seca (1). Cruzando el puente siguiente el camino y crearemos la riera justo antes de abrir al cul-de-sac del callejón de Mercuri. En este punto hemos de continuar por el sendero que discurre paralelo al margen derecho de la riera, hasta el próximo cruce, justo antes del segundo conjunto de patrimonio vinculado a la cultura del agua, formado por una deu, un safaireig y un pou (14). A partir de aquí el camino realiza tres cruces de calles: el c. Isidre Monell, la calle de la Playa del Racó y el c. Rocá del Mas Mató, cada uno de los cuales está señalizado con pasos de peatones. A partir de aquí, el sender sigue la riera hasta llegar al molino del mas Mató (15), un conjunto integral formado por un molino y una pared seca que acaba en forma de llitera "E" utilizada para acumular el agua que proviene de la fuente de la Pera. En la parte sur de la explanada hay un acceso que conduce a la calle Santiago Russiñol y que nos lleva a la playa de Sa Riera (16).

[FR] Le point de départ est le rond-point du cimetière, à l'entrée du village. En suivant la signalisation, nous traversons le parc de l'arbreda et nous arrivons à un parking situé juste au nord du parc (ce est le point de départ alternatif pour ceux qui arrivent en voiture). En sortant du parking, nous arrivons sur l'esplanade où se trouve l'ensemble composé d'une cisterna, d'une androne et d'un mur en pierre seche (1). Croissons le pont suivant et continuons le chemin jusqu'à l'intersection d'un autre ensemble patrimonial lié à la culture de l'eau, composé d'une source, d'un lavoir et d'un puits (14). À partir de là, le chemin passe trois rues différentes ayant toutes une passage piéton: la rue Idiá Monell, la route de la Plaça del Racó et la rue Rocà del Mas Mató. À partir de là, le sentier traverse la riera à trois reprises jusqu'au moulin du mas Mató (15), un ensemble composé d'un moulin et d'un mur en pierre seche qui empêche l'eau de ruisseler vers la source de la Pera. Sur la partie sud de l'esplanade, il y a un accès qui mène à la rue Santiago Russiñol qui conduit à la plage de Sa Riera (16).

[EN] The set out point is at the cemetery roundabout, at the entrance to the town. Following the signposts, we cross the woodland park and arrive at the car park, situated just to the north of the park (this is an alternative set out point for travellers arriving by car). Leaving the car park, we arrive at the esplanade, where we find a few points of interest; to **reservoir**, a **passage way and a dry stone wall** (1). Crossing the bridge, we continue the route and cross the stream, just before arriving at the cul-de-sac on Mercuri street. At this point, we must follow the path which flows parallel to the right bank of the stream until the next crossing, just before the second lot of places of heritage interest, linked to water culture, namely: a **spring**, a **washing and channel** and a **well** (14). From here, the route crosses over three streets: Isidre Monell street, Platja del Racó and Rocà del Mas Mató street, each of which has a pedestrian crossing. Following this, the path crosses the stream three times, before arriving at the **Mas Mató Mill** (15), where points of interest include the mill itself and the "E" shaped wall, used to accumulate water from the Pera fountain. On the south part of the esplanade, there is an access which leads to Santiago Russiñol street, bringing us to Sa Riera Beach (16).

[EN] Start the itinerary at the car park beside Mas d'en Pinc (8) where a signpost indicates the direction to leave. The trail goes through some woodland and ends at Mirador de la Creu (9) after about 15 minutes. Leaving this look out point, walk back down along the asphalted road to the start of the old trail. Just before arriving at the cul-de-sac on Mercuri street. At this point, we must follow the path which flows parallel to the right bank of the stream until the next crossing, just before the second lot of places of heritage interest, linked to water culture, namely: a **spring**, a **washing and channel** and a **well** (14). From here, the route crosses over three streets: Isidre Monell street, Platja del Racó and Rocà del Mas Mató street, each of which has a pedestrian crossing. Following this, the path crosses the stream three times, before arriving at the **Mas Mató Mill** (15), where points of interest include the mill itself and the "E" shaped wall, used to accumulate water from the Pera fountain. On the south part of the esplanade, there is an access which leads to Santiago Russiñol street, bringing us to Sa Riera Beach (16).
